

Energy Block Grants Work!

CAMPAIGN TO SAVE EECBG

Redlands Promotes Renewable Energy and Energy Efficiency

The City of Redlands, California is investing its Energy Efficiency and Conservation Block Grant (EECBG) funding to install a photovoltaic array at the City's local wastewater treatment plant. By increasing energy efficiency and creating new, renewable electricity generation, **Redlands will save thousands of dollars of taxpayer money each month while reducing atmospheric pollution.**

Redlands is using EECBG funding to ...

- **Install 462 solar panels expected to produce over 10,000 KWh each month** to serve the local wastewater treatment plant, saving the city thousands of dollars on their monthly energy bills.
- Partner with its local utility **to perform energy audits** that will ensure EECBG-funded activities conserve as much energy as possible.
- Reduce on-grid energy demand of the wastewater treatment plant **by more than 10%.**

For more information about Redlands' EECBG activities, contact Danielle Garcia at (909) 753-5800, or dgarcia@cityofredlands.org.

Impact on Redlands, CA

- \$678,400 in EECBG funding
- 9 jobs to be created
- 519 megawatt-hours in new renewable generation
- 373 metric tons of CO₂e emissions prevented

Organized by Climate Communities, the Energy Block Grants Work! campaign is showcasing how cities and counties across America are using federal Energy Efficiency and Conservation Block Grant (EECBG) dollars to create jobs, save energy, and reduce carbon pollution.
