

Energy Block Grants Work!

CAMPAIGN TO SAVE EECBG

Carson City Installs Solar Panels to Create Renewable Energy

Carson City, Nevada is using Energy Efficiency and Conservation Block Grant (EECBG) funds to plan, design and install a solar panel system at their Public Works building. By installing renewable energy technologies at the facility, Carson City is **creating a new source of renewable solar energy in the City and the corresponding green jobs needed to design and build the system.**

Carson City is using EECBG funding to ...

- **Create green jobs** in the development and design of a solar photovoltaic system at the Public Works building, managing the construction of the project, calculating energy savings and assisting with public outreach and reporting of results.
- Construct a renewable solar energy generation project that will **produce zero-emission renewable energy** and transmit excess electricity produced back to the grid.

For more information about Carson City's EECBG activities, contact Janice Brod at (775) 283-7069, or JBrod@carson.org.

Impact on Carson City, NV

- \$538,900 in EECBG funding
- 7 jobs to be created
- Solar panels installed at City complex

Organized by Climate Communities, the Energy Block Grants Work! campaign is showcasing how cities and counties across America are using federal Energy Efficiency and Conservation Block Grant (EECBG) dollars to create jobs, save energy, and reduce carbon pollution.
