

Energy Block Grants Work!

CAMPAIGN TO SAVE EECBG

Clarksville Improves Energy Efficiency of Public Services

The City of Clarksville, Tennessee is utilizing its Energy Efficiency and Conservation Block Grant (EECBG) funding to embark on a multi-pronged strategy **promoting immediate energy conservation and laying the groundwork for future energy efficiency improvements.** Through these projects, Clarksville continues to make significant progress towards lowering the operating costs of municipal utilities and buildings.

Clarksville is using EECBG funding to ...

- **Retrofit the City's street lighting with long-lasting, highly efficient LED fixtures**, saving millions of kilowatt-hours of electricity each year.
- **Conduct municipal building audits as well as training on new energy codes** for officials and builders, laying the groundwork for additional future energy efficiency improvements.
- **Re-commission and upgrade several city-owned buildings with improved HVAC and lighting systems** to lower operational costs through reduced electricity bills.

For more information about Clarksville EECBG activities, contact Ron McClurg at ron.mcclurg@cityofclarksville.com.

Impact on Clarksville, TN

- \$1.115 million in EECBG funding
- 24 jobs to be created or retained
- 14,076 MWh of energy conserved annually
- 13,135 metric tons of CO₂e emissions prevented

Organized by Climate Communities, the Energy Block Grants Work! campaign is showcasing how cities and counties across America are using federal Energy Efficiency and Conservation Block Grant (EECBG) dollars to create jobs, save energy, and reduce carbon pollution.
